Related Projects

Aya Prover, Practical Implementation of Dependent Types (role: project leader) 

- Supports dependent types, dependent pattern matching with confluence check for overlapping cases, higher inductive types, GADTs, hierarchical universes, cubical type theory features, and implicit arguments.
- Supports visualization of the type checking traces and exporting elaboration result to HTML or LaTeX. Supports LSP in VSCode. Binaries releases are built with jlink and GraalVM native-image.

IntelliJ Pest, Pest language plugin for IntelliJ Platform 

- Semantic-based highlighting, completion, navigation, definition extraction/inlining, and Rust plugin integration.
- Provides live preview – test grammar files by dynamically highlighting user code according to the grammar on the fly. These highlighted code could be exported to HTML.
